Support Structures

Boat Rental Dock

The boat rental dock will allow visitors to have access and explore the energy installation from the water. Non-slip resistance adhesive and barriers will allow a safe experience for visitors on the dock.

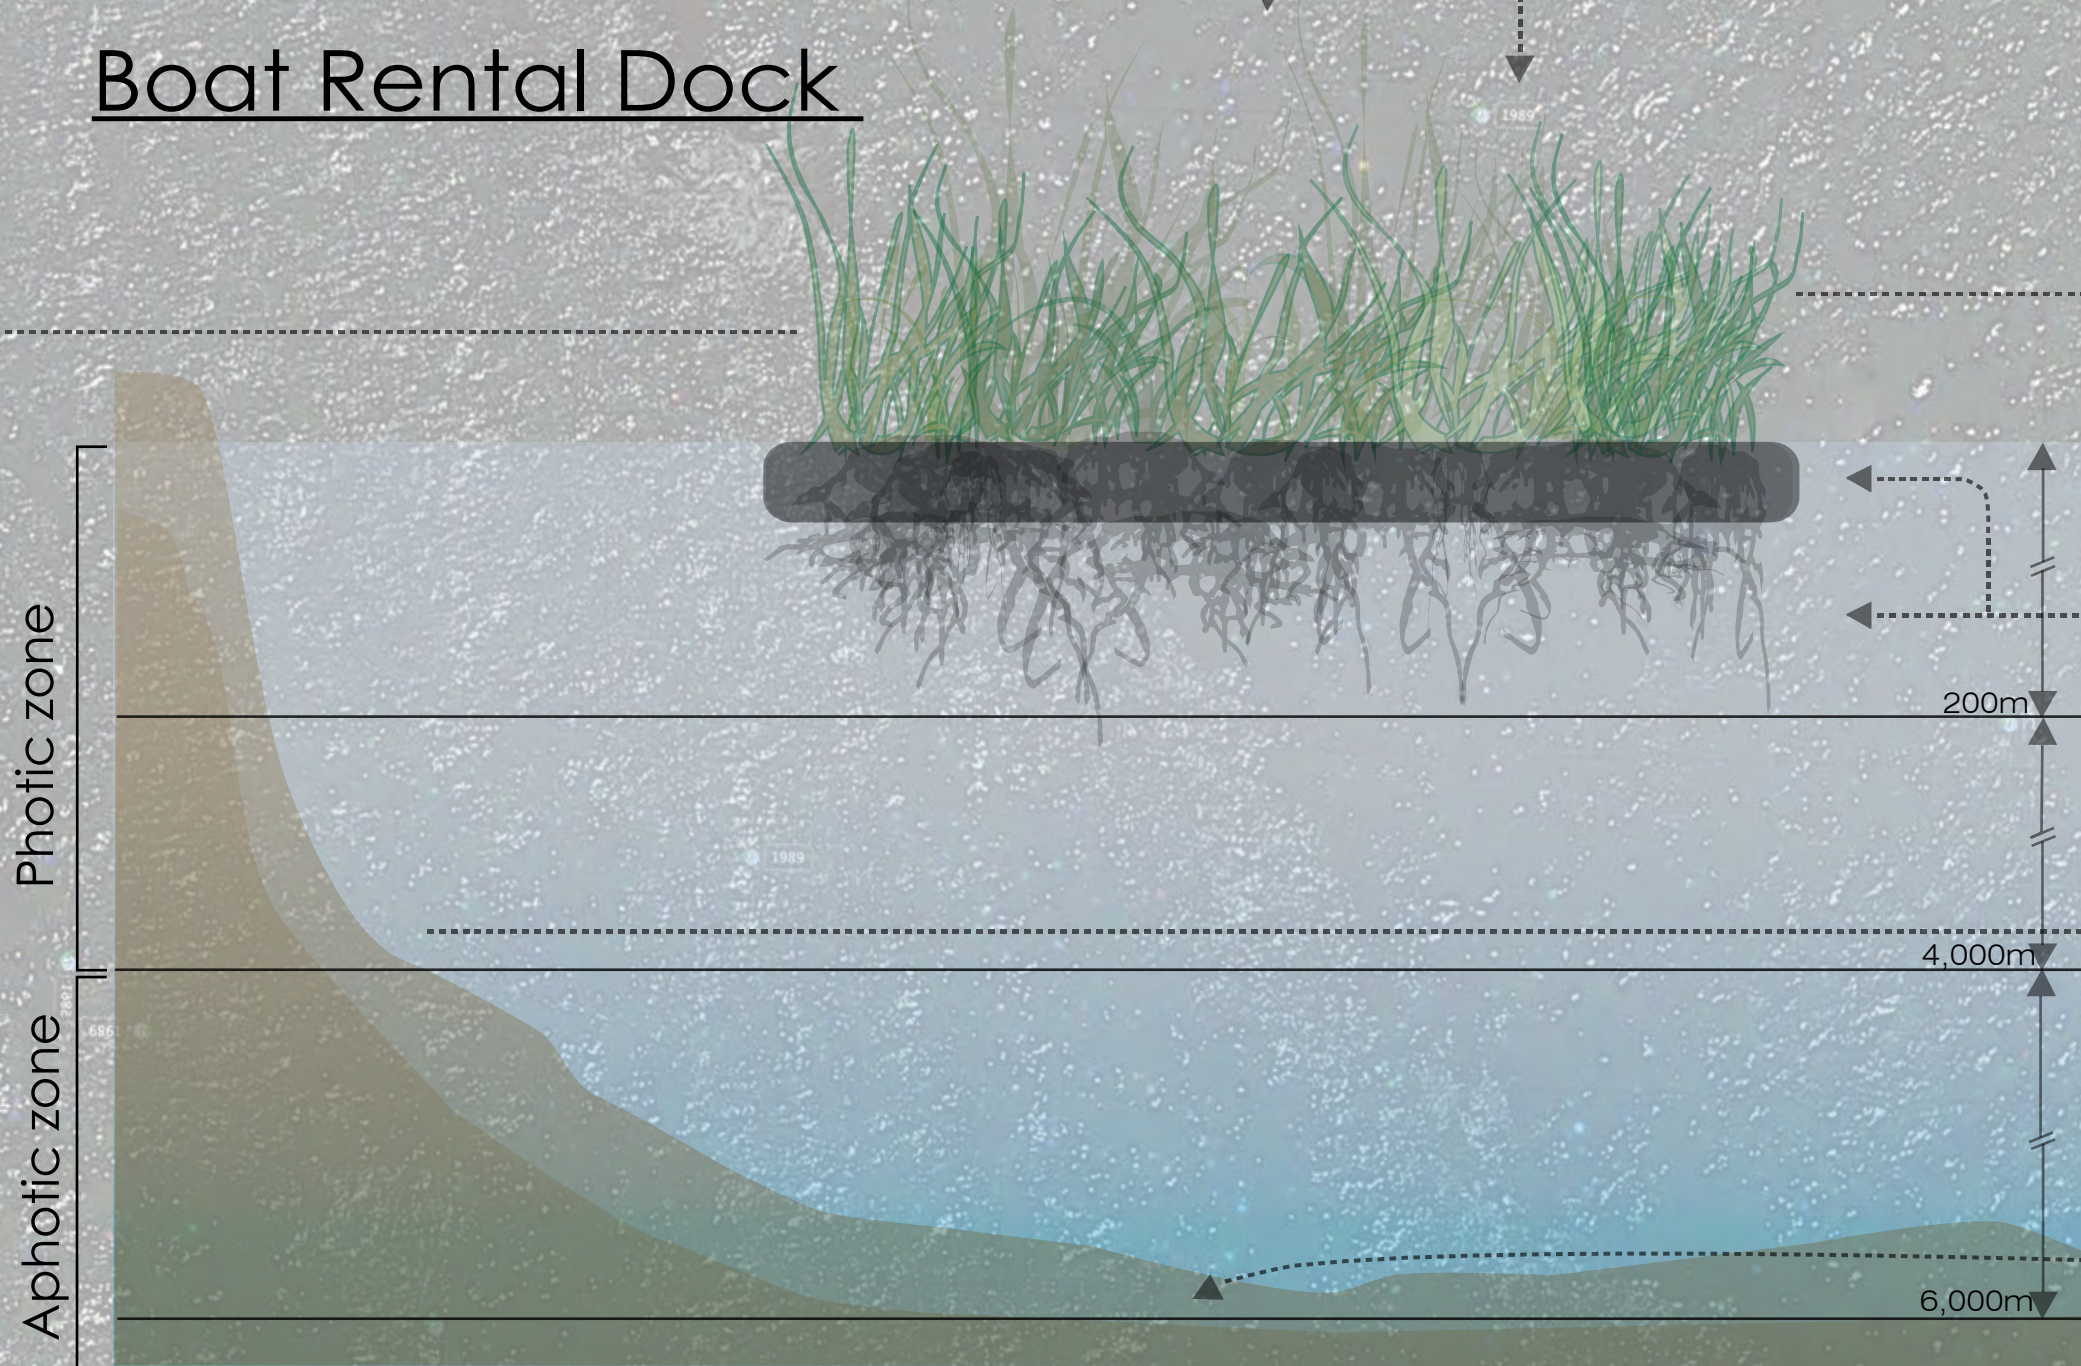

Floating Wetlands Form

Size of wetlands range from 35m to 10m in length and 25m to 2m in width depending on each shape of the wetland in each area.

Bolt and steel fasteners are placed 2m apart between each floating wetland
