

Santa Monica CA. Caldereros

Grid Conected Wind generators

Grid Conected Wave energy desalination

Wind Energy

Wind turbines SWT -2.3-93 are mounted on a tower to capture the most energy. These structures are 80 meters high.

Wave Energy

CETO is a wave-energy technology that converts kinetic energy from ocean swell into electrical power. and (in CETO 5) directly desalinates freshwater through reverse osmosis.

Wave Energy

Ceto Wave Power
Company: Carnegy
Country of Origin: Australia
Capture Method: Buoy
Power Take off: Pump to Shore
Rated Power: 1MW

Wind Energy

Wind Turbine
Turbine Name: SWT-2.3-93
Manufacture: Siemens
Rated Power: 2.3 KW

Estructure Materials

Plataform in Cement
Bases and spheres in Steel
In different colors.
Half Spheres on the Cetos in Steel
