

#### Formal Garden

This Garden is mainly for visitor to appreciate the art of gardening. Garden artists can have exhibition on the barge. It could potentially host small ceremonies such as wedding ceremony.

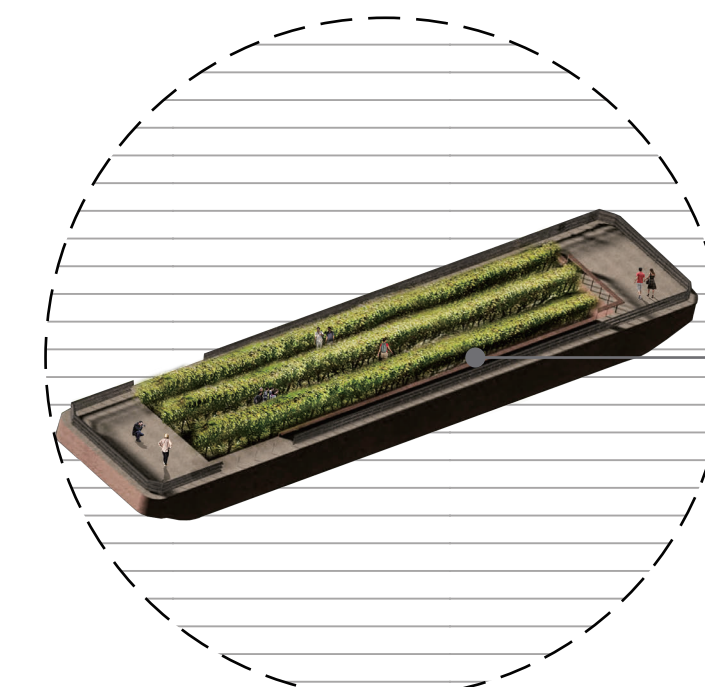

#### Mangrove

Mangrove provides bio- diversity for local environment and enhances habitat environment for fish and birds. Mainly species include Red mangrove and white Mangrove.

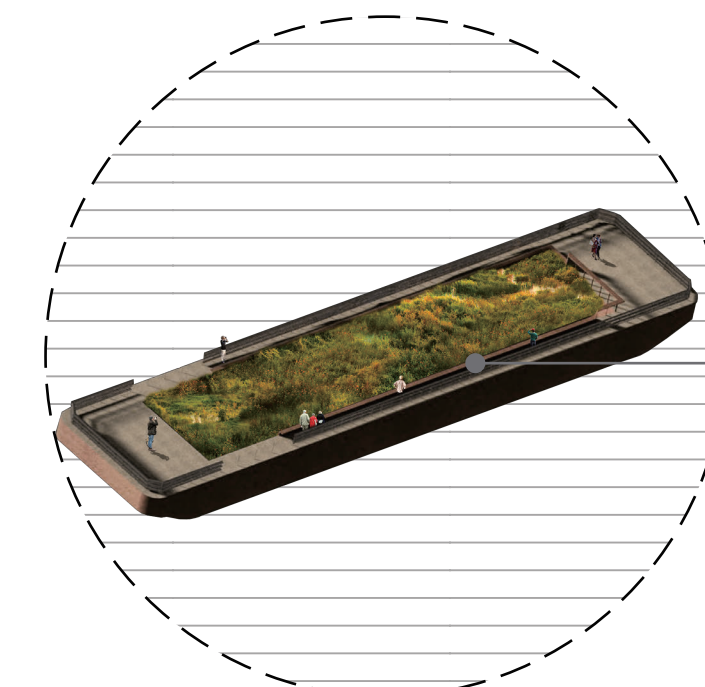

#### Wildlife Sanctuary

Wildlife Sanctuary are designated for wildlife protection and habitat restoration. Endangered amphibian like California Red-legged frog, salamander, birds, and reptile species can find a safe habitat on the barge.

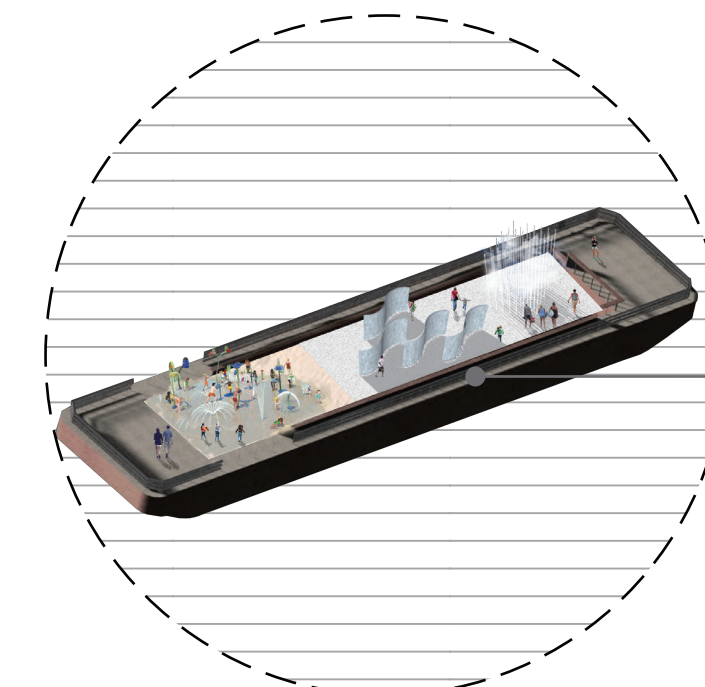

#### Vineyard

California is famous for its beautiful vineyards. Utilizing the desalinated water generated from the pyramid structure for irrigation, this barge makes it possible to celebrate the winery culture of California at a special site with extraordinary experience.

#### Wetland

Barge designated for wetland restoration can be beneficial for local environment. The plants includes common California native plants such like Rushes, Sedges, Bulrush, Cattail, Spike Rush, Alders. The Wetland species are planted in a modular planter box and can be transplanted easily.

#### Water Play and Water Art

Children can enjoy the water entertainments facilitated by the desalination plants. Temporary water art show can be host as tourist attraction events.
