

MATTE FINISH SURFACE REDUCES REFLECTIONS AND GLARES SO THAT WILDLIFE ARE NOT AFFECTED. SELF-CLEANING FINISHES ENSURE LOW MAINTENANCE REQUIREMENTS.

LIGHT WEIGHT MATERIAL TO ENSURE A STABLE SURFACE WHEN BIRDS RESTS ON THEM

DIFFERING JOINT LOCATIONS OF LIGHTWEIGHT TIPS ENSURE A RANGE OF DIFFERENT MOTIONS FOR EVERY ARM

MAX 10M IN LENGTH

RANGE OF MOVEMENT DEPENDS ON WIND FORCE AND JOINTS LOCATION. MAXIMUM RANGE APPLIES TO ALL STRUCTURES

STATIC WATER LEVEL ELEVATION NORTH-SOUTH NTS

Visitors can travel through the forest of arms on a boat, enabling them to experience a range of spatial configurations depending on the time of the day and the movement of the arms. It is an interactive installation that can be experienced physically.

ARM ENDS ARE FILLED WITH AIR TO REDUCE WEIGHT
