

# the KITE

A walk on the sea shore rejuvenates us, as we experience being in the lap of nature. The huge body of water, the setting sun on one side and the manmade colonies on the other. The sea shore is the edge. Beyond this edge reside the unknown forces of nature. This seems exciting and thought provoking. Art is the reflection of man's thoughts and his abilities to pioneer creative skills.

To a child, a simple kite flying in the sky seems amazing. The skillful design enables it to fly

. What is it? Can one approach it?

It is a visual delight to watch a swaying kite and that too in the context of the ocean. A floating deck choreographed with (high) dancing fountains adds to the visual delight. The kite hovers over the deck and frames the setting sun and mountains on the coast. Light show in the evening seems as a spectacle in the waters.

4412KITE\_1

Water is a prominent feature covering 2/3rd of the globe. Any imbalance in the ecosystem therein affects globally. The land art according to us is a water based installation educating the citizens of Santa Monica about the health of the Pacific Ocean.
