

BUBBLE IN THE SEA

VIEW FROM THE BEACH

Watching the amazing sunset and feeling
may be another wonderful sunset beauty.

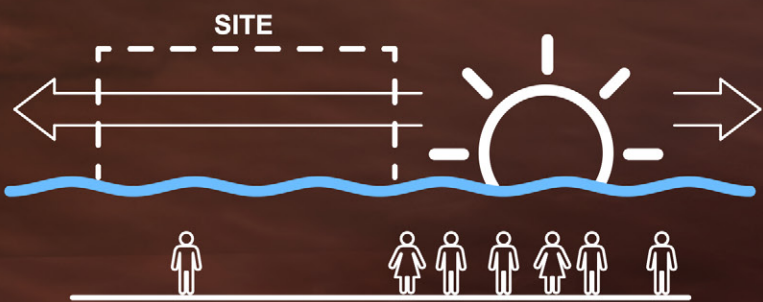

SANTA MONICA PIER

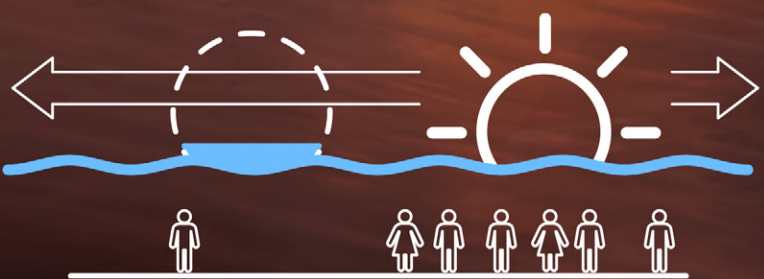

is one of the nine holy land to enjoy the sunset. People came here to watch the sunset beauty day after day in an endless stream. The wonderful sunset as a local famous landscape is must be protected. So we don't want to build a massive structures to hindered the beauty of the sunset.

SANTA MONICA PIER

In a year, the sun azimuth's change make the periodic changes of the location of the sunset. So the angle that people enjoy the sunset also be changed. Any entity placed in the base will stop people enjoying the sunset.

So we choose a transparent sphere to intervent the landscape. It will not cast a huge shadow and more like a bubble in the water. What's more, it may be strengthen the light of the sunset at a certain angle.

After be desalination by the device , the fresh water will periodically be transported to the bubble and to be stored. In the projection of the light, the image of the bubble become clear.

When the sun sets, the lighted bubble will instead of the sunset to strengthening the landscape value of the seaside. What's more, the change of quantity of fresh water in bubble can let people see the elapse of the fresh water straightly and remind us to save fresh water. This effecton is more important than the facility itself.
