

# CATCHING THE WAVE

*Catching the Wave* is an artistic impression of the historical context of the Santa Monica Pier and its breakwater. In its long history the area behind the breakwater was once home to a yacht harbor filled with sail boats and moorings. Protected by the breakwater, the yacht harbor was an oasis at sea. *Catching the Wave* utilizes the relationship of a sail ship and its mooring, exaggerates the scale of both silhouettes, and moves the fleet to the west side of the breakwater to capitalize on the raw energy of the ocean's waves.
