

# THE CLEAR ORB

## Location

Our artwork is located on the side of the existing breakwater and connected with the Santa Monica Pier. It is considered to minimize the destruction of the marine ecosystem by utilizing the existing one in the site boundary.

## Concept

We envision possibilities to maintain the nature more environmentally-friendly by this art installation.

**Idea 1: The Orb**  
The orb represents the origin of life and energy on earth : produces pure water and electric power functionally. We intend to create the feeling of visual pleasure by balancing between the orb and a landmark of this city, Santa Monica pier.

**Idea 2: The Contemplation Walk**  
The contemplation walk would be an attractive space for visitors to enjoy beach walk. We intend they take a walk in ease and contemplate on this path. By extension, it generates electric energy using wave power.
